Pain: No Yes

Psychosocial/Depression: No Yes

Other (enter type(s)):

Familial Cancer Risk Assessment

Breast and or ovarian cancer in 1st or 2nd degree relatives: Yes No

Received Genetic counseling: Yes No Genetic testing: Yes No Genetic testing results:

Follow-up Care Plan

Your follow-up care plan is design to inform you and primary care providers regarding the recommended and required follow-up, cancer screening and routine health maintenance that is needed to maintain optimal health.

Possible late- and long-term effects that someone with this type of cancer and treatment may experience:

Weakening of the heart presenting as shortness of breath and swelling of legs (rare < 5%); and bones become weak and at risk for fracture (osteoporosis). It is important to remember that these symptoms can be due to other causes like diabetes or with normal aging. If these or any other new symptoms occur bring these to attention of your health care provider.

These symptoms should be brought to the attention of your provider:

1. Anything that represents a brand new symptom;
2. Anything that represents a persistent symptom;
3. Anything you are worried about that might be related to the cancer coming back.

Please continue to see your primary care provider for all general health care recommended for a woman your age such as routine immunizations, and routine non-breast cancer screening like colonoscopy or bone density exams. Consult with your health care provider about prevention and screening for bone loss using bone density tests.

Schedule for Clinical Visits

Coordinating Provider	When/Frequency

Cancer Surveillance Or Other Recommended Tests

Coordinating Provider	TEST	Frequency
	Mammogram	Annually
	MRI breast	As indicated by provider
	Pap/pelvic exam	As indicated by provider
	Colonoscopy	As indicated by provider
	Bone Density	Every 2 years if on an aromatase inhibitor or as indicated by your provider

Breast cancer survivors may experience issues with the areas listed below. If you have any concerns in these or other areas, please speak with your doctors or nurses to find out how you can get help with them.

- | | | |
|---|---|---|
| <input type="checkbox"/> Anxiety or depression | <input type="checkbox"/> Insurance | <input type="checkbox"/> Sexual Functioning |
| <input type="checkbox"/> Emotional and mental health | <input type="checkbox"/> Memory or concentration loss | <input type="checkbox"/> Stopping Smoking |
| <input type="checkbox"/> Fatigue | <input type="checkbox"/> Parenting | <input type="checkbox"/> Weight changes |
| <input type="checkbox"/> Fertility | <input type="checkbox"/> Physical functioning | <input type="checkbox"/> Other |
| <input type="checkbox"/> Financial advice or assistance | <input type="checkbox"/> School/work | |

A number of lifestyle/behaviors can affect your ongoing health, including the risk for the cancer coming back or developing another cancer. Discuss these recommendations with your doctor or nurse:

- | | | |
|---|--|--------------------------------|
| <input type="checkbox"/> Alcohol use | <input type="checkbox"/> Physical activity | <input type="checkbox"/> Other |
| <input type="checkbox"/> Diet | <input type="checkbox"/> Sun screen use | |
| <input type="checkbox"/> Management of my medications | <input type="checkbox"/> Tobacco use/cessation | |
| <input type="checkbox"/> Management of my other illnesses | <input type="checkbox"/> Weight management (loss/gain) | |
