

BREAST CANCER SCREENING SAVES LIVES

About **44,130**
women in the United
States are expected
to die from breast
cancer in 2021

**1 IN 8 WOMEN IN THE UNITED STATES WILL
DEVELOP INVASIVE BREAST CANCER
IN THEIR LIFETIME**

#1

Breast cancer ranked
#1 in new cases of
cancer among women in
Pennsylvania in 2018 with
11,186 women diagnosed

#2

Breast cancer was the
second leading cause
of cancer death in
Pennsylvania in 2018
with 1,963 deaths

A mammogram is the best way to detect breast cancer. The sooner it is diagnosed and treated, the better your chances are to beat it! Many women have delayed their mammogram due to COVID, but now is the time to talk to your provider.

If you are 40 or older, a screening can **save your life.**

If you already had your annual mammogram, please let us know so we can update your records. If you have not had a mammogram, please contact our office to schedule an appointment to receive your referral.
