

CERVICAL CANCER SCREENING SAVES LIVES

91% of Cervical
Cancers are
caused by the
Human Papilloma
Virus (HPV)

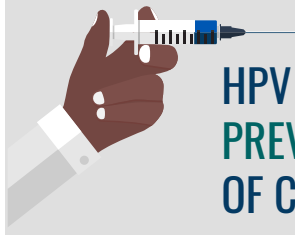

ALL WOMEN OVER 21 YEARS OF AGE SHOULD BE SCREENED

The American Cancer Society
(ACS) estimates that in 2021 in
the United States:

14,480 new cases of invasive
cervical cancer will be
diagnosed

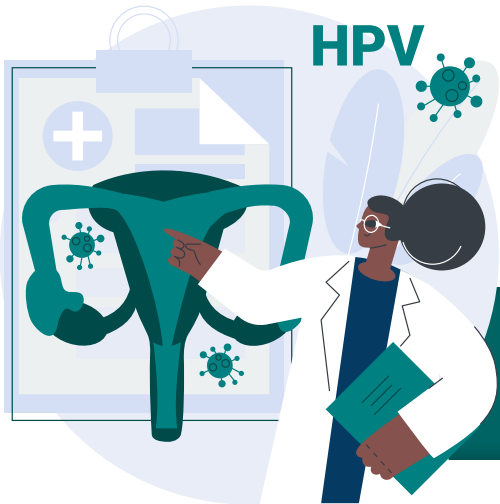

4,290 women will die from
cervical cancer

**IN 2018, 478 WOMEN IN
PENNSYLVANIA WERE DIAGNOSED
WITH CERVICAL CANCER**

**HPV VACCINATION CAN
PREVENT OVER 90%
OF CERVICAL CANCERS**

HPV

Getting a regular Pap Test or HPV test is the best way to detect abnormal cells before they turn into cervical cancer. Many women have delayed their cervical cancer screening due to COVID, but now is the time to talk to your provider.

If you already had your cervical cancer screening, please let us know so we can update your records. If you have not had a recent cervical cancer screening, please contact our office to schedule an appointment.
