

QUALITY INSIGHTS AND YOU:

Working Together to Improve Cancer Survivorship Care in Delaware

A cancer diagnosis is devastating. As a trusted health care professional, your support and guidance can make a huge difference in how your patients navigate the cancer treatment and recovery process.

Quality Insights is spearheading an exciting new program for medical providers to improve survivorship care and the quality of life for patients who have been diagnosed with cancer. Our team has been working with practices on cancer screening quality improvement activities and has the capacity to **enroll a limited number** of practices into this new expansion project. Please consider joining us in this important initiative.

Benefits of Participation

- Tailored education around cancer survivorship guidelines and standards of care
- Assistance using electronic health records to plan for follow-up care for survivors of cancer
- No-cost letter campaign referring patients to community-based survivorship support programs
- Access to provider & patient educational materials, resources and tools
- Monthly office hours with Quality Insights staff for additional program implementation assistance

Requirements to Participate

- Designate an individual to act as the primary contact for Quality Insights
- Actively participate in a lunch and learn training session for a survivorship program of your choice
- Serve patients with a history of cancer
- Provide feedback on enablers and barriers to implementing guidelines
- Share education materials provided by Quality Insights with your staff and patients

If you are interested in participating in this program and would like more information or would like to sign up, please contact Sarah Toborowski at stoborowski@qualityinsights.org or call **302.290.9049**. Your participation in this work creates a foundation for your practice's quality improvement efforts, as well as prepares your practice for future value-based payment models.
